

## Essilor Transitions with Crizal lenses competition winner

A competition was recently held by Essilor Transitions lenses in conjunction with Varilux Consultant Opticians throughout the country.

Onlookers are a 5 star Varilux Consultant. The competition was open to any customer who either purchased or discussed with a member of staff the benefits of Essilor Transitions lenses with a crizal anti reflection coating.

Essilor Transitions VI lenses automatically adapt to changing light conditions to reduce eye fatigue and eye strain. They are darker outdoors, and clear indoors.

The winner for the North of England was Onlookers customer David Trainer whose name was drawn out at random.

David is pictured with his competition prize of a Felt hybrid mountain bike with Onlookers Dispensing Optician and practice manager Andy Hodgson.

## Transitions<sup>®</sup> adaptive lenses are designed to be worn every day

Transitions are fast acting photochromic lenses which give you automatic protection from the sun and are the ideal everyday choice for healthy sight.

They provide visual comfort and enhance visual quality, helping you to see better today. And like sunblock protects your skin, Transitions lenses block 100% of harmful UVA and UVB rays helping to protect the health and wellness of your eyes so you can see better tomorrow too.

**Combine Transitions lenses with an Anti-reflection coating for ultimate performance.**

As well as actually increasing the speed of fade back, the lenses stay much cleaner for much longer.

Transitions are available in either Grey or Brown.
